Art Unit: 1746

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

Page 2

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

2. Claims 1-5, 8-10 and 12 are rejected under 35 U.S.C. 102(b) as being clearly

anticipated by Rodd et al. (U. S. Pat. No. 6,581,800).

Re claim 1 for example, note the Rodd discloses a device for receiving and hold a

plurality of unit doses (5) of a detergent composition and for individually dispensing the

unit doses into an automatic dishwashing machine over a plurality of washing cycles,

wherein the device comprises;

(i) a housing (4) adapted to receive the plurality of unit doses, each

separately contained in compartment of a plate, the unit doses being

arranged along the circumference thereof;

(ii) means(6) for opening a compartment or for ejecting a unit dose

therefrom; and,

(iii) means to allow access of wash liquor to the unit dose contained in the

opened compartment or ejected therefrom, within a controlled time period

to allow dissolution of the unit dose into wash liquor of the machine.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Application/Control Number: 10/506,296

Art Unit: 1746

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 6, 7 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rodd et al. in view of either WIPO'527 (WIPO WO 01/25527) or Germany'256 (Germany 101 14 256).

Claim 6, 7 and 11 define over Rodd only in the recitation of the agent being ejected as a function of the temperature or time. WIPO'527 and Germany'257 each disclose the arrangement of providing means to eject washing a agent as a function of several washing parameters. It therefore would have been obvious to one having ordinary skill in the art tom modify the arrangement of Rodd, to include control means as taught by either WIPO'527 or Germany'257, for the purpose of precisely delivering the agent to enhance the washing process

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In EPO'319, Cole-Bennett, Rothgeb et al., Joshi, WIPO897, WIPO'480, and Ender, note the dosing means.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRANKIE L. STINSON whose telephone number is (571) 272-1308. The examiner can normally be reached on M-F from 5:30 am to 2:00 pm and some Saturdays from approximately 5:30 am to 11:30 am.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr, can be reached on (571) 272-1700. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
